MRP PRICE LIST OF PHYSIOTHERAPY EQUIPMENTS

SL. NO.	DESCRIPTION	PRODUCT IMAGE
1	SHORT WAVE DIATHERMY - Shortwave Diathermy without Disc is a type of electric machine that uses electromagnetic energy to produce deep heating in joints and soft tissues. - Shortwave Diathermy without Disc works by using a high-frequency electric current to stimulate heat generation within body tissues.	
2	SOLID-STATE SHORT-WAVE DIATHERMY - Multiple Therapy: Enjoy the benefits of TENS therapy, Interferential Therapy, Mini Stimulator, ultrasonic waves, and deep heat in one device. - Multiple Treatment Modes: Choose from various therapy modes to target different types of pain.	
3	ADVANCED ULTRASOUND THERAPY - Ultrasound machines are a treatment modality used by physical therapists that utilize high frequency sound wave. - This promotes tissue relaxation and therefore is useful in treating muscle tightness and spasms.

NO.	PRODUCT & DESCRIPTION	PRODUCT IMAGE	FEATURES / BENEFITS
4	DYNO ULTRASOUND THERAPY Therapeutic Ultrasound provides therapeutic deep heat treatment for Relaxation Reduce swelling and inflammation. Promote the synthesis of proteins inside the cells Lymphatic Drainage with cellulite reduction Regenerate wounded tissues		- Deep Heat Therapy - Reduces Swelling & Inflammation - Promotes Protein Synthesis - Lymphatic Drainage & Tissue Regeneration
5	MICRO CONTROL BASE ULTRASOUND THERAPY - Ultrasonic Therapy: Utilises high-frequency sound waves to enhance tissue healing and provide pain relief. - Electrotherapy: Delivers electrical stimulation to muscles, promoting pain relief and rehabilitation.		- High-Frequency Ultrasonic Therapy - Electrical Muscle Stimulation - Pain Relief & Rehabilitation
6	HANDY DIGITAL ULTRASONIC - Portable, easy-to-use, space saving design. Removing spots, wrinkles and pimples - Offers an adjustable intensity level power control. Max frequency is 1Mhz. More powerful than most same price portable ultrasonic device Making your skin look clean and softer		- Portable & Easy to Use - Adjustable Intensity Power Control 1Mhz Frequency Powerful Performance - Removes Spots, Wrinkles & Pimples
7	PHYSIO MUSCLE STIMULATOR MINI Increases healing of tissues by enhancing protein synthesis and increased micro circulation Joint Pain, Neurogenic Pain, Neck and Back Pain, Muscle stimulation, Arthritis Sports Injuries, Healing and repair, Spinal Cord Injury, Low back pain Cervical spasms/pain Shoulder pain, Hip strain Foot or ankle pain		- Improves Micro Circulation - Relieves Joint & Muscle Pain - Supports Sports Injury Recovery - Effective for Neck, Back & Spinal Pain
8	PHYSIO MUSCLE STIMULATOR THERAPEUTIC - Treats you with electro therapy - Used for physio therapy at clinics and hospitals a like Is easy to use due to the simple design Have effective changes and improves health - Keeps you active and full of energy		- Electro Therapy Treatment - Ideal for Clinics & Hospitals - User-Friendly Design - Boosts Energy & Overall Health
9	MUSCLE STIMULATOR DIAGNOSTIC Physio care's Muscle Stimulator is a compact and advanced digital model specifically engineered for both diagnostic and therapeutic applications. This versatile device serves multiple purposes, including plotting the Strength Duration Curve and stimulating both innervated and denervated muscles		- Diagnostic & Therapeutic Applications - Strength Duration Curve Plotting - Stimulates Innervated & Denervated Muscles - Compact & Advanced Digital Model

10

MINI TENS PORTABLE TWO CHANNEL

- Two in one: This single physiotherapy machine manages both TENS and EMS functions. It provides electrotherapy as well as muscle stimulation in physical therapy sessions making the process of recovery easier for both patients and therapists.
- Physical therapy at the comfort of your home: This machine can be easily carried around and set up. It's compact, portable and very useful for home sessions.

Dual Therapy
TENS + EMS

15

COMFY TENS PLUS MINI FOR PAIN MANAGEMENT

- 2 Channel with Multi-intensity Settings: Works as a nerve stimulator, muscle stimulator, and electric massager with a dual-channel control system so that you can enjoy 2 different modes with 2 different strengths at a time. The device has 12 programs including 7 pre-set programs to deliver varied frequency range for therapy.

2 Channel Output

Multi-intensity Settings

12 Programs (7 Pre-set)

Portable & Easy to Use

16

PHYSIO POCKET INTERFERENTIAL THERAPY MACHINE

- Channels: Dual, isolated between channels
Dimensions: 107x62x27mm Weight: Approximately 150 grams, battery included
Amplitude: Adjustable 0-60mA peak into 500 ohm load each channel, constant current
Carrier Frequency: 4000Hz fixed (CH1) Modulating Frequency: 4004-4160Hz, Adjustable (CH2)

Dual Channel

Adjustable Intensity (0-60mA)

Carrier Frequency 4000Hz

Compact & Portable

17

INTERFERENTIAL THERAPY (IFT)

- Treats you with electro therapy
- Used for physio therapy at clinics and hospitals a like Is easy to use due to the simple design
- Pain management, Hip & Knee Pain, Relief from Acute Pain, Relief from, Chronic Pain, Relax Muscle Sprain, Muscle Re-education

Electro Therapy

Simple & Easy Design

Pain Relief

Clinics & Hospitals Use

18

COMPUTERIZED INTERFERENTIAL THERAPY (29 PROGRAMME)

- Keeps you active and full of energy
Have effective changes and improves health Is easy to use due to the simple design
- Used for physio therapy at clinics and hospitals a like Is easy to use due to the simple design Used for physio therapy at clinics and hospitals a like.

29 Programs

Energy & Vitality

Improves Health

Clinics & Hospitals Use

19

PHYSIO LCD BASED INTERFERENTIAL THERAPY CUM TENS CUM MS

- Interferential Therapy Machine with LCD Display Program based. The Physiotherapy IFT Machine has 125 inbuilt programs. Easy to use Table Model. The Physiotherapy machine has IFT with MS, TENS & Russian current. Best model for Clinical & Hospitals, can be used at home also.

LCD Display

125 Inbuilt Programs

IFT, MS, TENS & Russian Current

Home & Clinical Use

20

ELECTRO VACUUM THERAPY

- The Vacuum therapy is a therapeutical method which uses the effect of the vacuum in the body by combining the improvement of the tissue microcirculation with an anti-inflammatory and detoxing action.

IMPROVES
MICROCIRCULATION

DETOXING &
ANTI-INFLAMMATORY
ACTION

21

PORTABLE DUAL CHANNEL TENS CUM ULTRA SONIC THERAPY MACHINE

- Therapy mode: Asymmetrical Bi-Phase Square Plus
- Dual channels, isolated between channels
- Amplitude current: 0-80mA peak to peak into 500 ohms load each Channel

DUAL CHANNEL
THERAPY

TENS + ULTRASONIC
COMBINATION

22

COMBINATION ELECTROTHERAPY + ULTRASOUND THERAPY MACHINE

- LCD Display, IFT MS TENS can be generated @ one output Terminals and US output @ other Output terminal
- Accessories: 1 pc Carry Bag ,2 Gel Bottle, 2 Set Strap , 4 pc Wire , 4 PC Pads , 1 Pen Electrode , 1 US applicator, 1 US wire, 1 Main cord

TENS + IFT + US
ALL IN ONE

EASY TO OPERATE

PHYSIOTHERAPY & TRACTION EQUIPMENT RANGE

26

COMBINATION IFT+US+TENS COMBO ANALOGUE

- Combination Therapy Ultrasound 1 MHz and TENS 4 channel (Manual/Analogue) Electrotherapy
- Designed For: Physiotherapy, Rehabilitation, Pain Management, Nerve Stimulator and therapeutic Ultrasound, Electrotherapy Combination therapy

27

PHYSIO CERVICAL CUM LUMBER TRACTION MACHINE

- Cervical Cum Lumber Traction Machine used by Physiotherapist for Lumber and Cervical Traction.

28

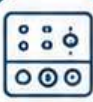

PHYSIO CERVICAL TRACTION MACHINE

- Traction force - 0 45 KG (can be doubled to 90 kg with the help of double, Modes: Static, Intermittent, Digital timer Display
- The traction unit works by applying a pulling force to the patient's spine to relieve pressure and reduce pain.

29

LCD BASED CERVICAL CUM LUMBER HARMONIC TRACTION MACHINE

- Incremental Mode: gives lumber traction in increment step 5 kg after 20 kg
- Increases Traction force in steps of 5 Kgs during Lumbar Traction to prevent sudden high load to the spine. Also, it slowly stretches the spine
- Traction Force: 5 kg to 50kg

30

LCD BASED CERVICAL CUM LUMBER INCREMENTAL TRACTION MACHINE

- Incremental Mode: gives lumber traction in increment step 5 kg after 20 kg
- Increases Traction force in steps of 5 Kgs during Lumbar Traction to prevent sudden high load to the spine. Also, it slowly stretches the spine

31

TRACTION BED FOUR-FOLD WITH DRAWER

- Complete Bed length with Traction Plate form Length 237 cm, Width 60cm Height 76cm including mattress the frame and leg all made of heavy duty crc
- (Cold Rolled Coil) pipe with Powder coated finish. The top made mattress of High-density stretchy sponge and Artificial pu synthetic Leather

SANVI REHAB CARE

RESTORING MOBILITY • REBUILDING CONFIDENCE

OUR PRODUCTS

Premium Quality • Trusted Care • Better Outcomes

32

TRACTION BED TWO-FOLD WITH WOODEN BASE

- We provide state-of-the-art physiotherapy and rehabilitation devices designed to support patient recovery and enhance therapeutic outcomes.
- Our extensive range includes a variety of medical equipment essential for diagnostics, treatment, and patient care. We focus on delivering reliable, durable, and technologically advanced solutions that are crucial in modern healthcare settings.

33

PHYSIO CPM MACHINE

- Treats you with electro therapy
- Used for physio therapy at clinics and hospitals a like Is easy to use due to the simple design Have effective changes and improves health Keeps you active and full of energy

34

KNEE-FLEX EXERCISE BOARD

- Knee range of motion
- Knee surgery
- Knee Glider
- Knee post-op exercise
- Knee exercise

35

PARAFFIN WAX BATH (SMALL SIZE)

- Paraffin Wax Bath Machine is used for paraffin wax bath of lower and upper limbs. It's another form of heat treatment modality which is helpful for conditions like arthritis and fibromyalgia by improving blood flow and reduction of stiffness in joints.

36

REUSABLE GEL BASED HOT & COLD PACK

- Flexible And Reusable: We craft our hot pack from a sturdy, leak proof plastic, so they're designed to be used over and over again. They're also designed to remain soft and pliable when cold, so you can Mold them to aches and pains on your body. Our packs can be used both for both cold and hot therapy.

37

MOIST HEAT THERAPY 4 PACK MACHINE WITH PAD SEPARATOR WITH WATER DRAIN TUB

- Moist Heat Retention: Moist heat packs are designed to retain moisture during the heating process, allowing them to provide moist heat therapy.
- Heat Retention: Moist heat packs are constructed with materials that are effective at retaining heat.

38

WALL MOUNTED LARGE SHOULDER WHEEL EXERCISE

- Handle Rod for Smooth Shoulder Rotation, Light weight, easy to install at home and clinics. Have effective changes and improves health Ideal for shoulder, wrist and forearm exercise. Resistance is controllable from zero to maximum by tightening the strap. Easy to unscrew and take little space to store

39

COMPACT SHOULDER WHEEL & WRIST EXERCISER WITH SCALE

- Compact Shoulder Wheel offered comes in superior construction finish and provides exercising support to shoulder muscles in physiotherapy process
- Further, the compact design finish of the equipment also makes it easy to fix on walls as well as convenient to use

40

QUADRICEPS EXERCISER CHAIR WITH BACK REST

- This leg extension machine is designed to isolate and strengthen the quadriceps, providing an effective lower body workout.
- Easily customize the machine to fit your body. Adjust the seat height and backrest to ensure optimal comfort and alignment during your workout.

41

PEDO CYCLE MANUAL

- Closed loops to secure your foot while paddling
- Fitness Cycle Which Can Be Placed Anywhere While in Use
- Rehabilitation Aids
- Paddler for indoor exercise

42

ANKLE EXERCISER

- Is easy to use due to the simple design
- Keeps you active and full of energy
- Used for physio therapy at clinics
- Have effective changes and improves health

43

HEEL EXERCISER

- Enhancing ankle strength, stability, and flexibility is important for athletes, fitness enthusiasts, and people healing from ankle injuries.
- The Ankle Exercise device was made with comfort in mind. Its smooth, long-lasting resistance mechanism and padded ankle cuff provide little discomfort and ease of usage.

RESTORING MOBILITY • REBUILDING CONFIDENCE

SANVI REHAB CARE

REHABILITATION EQUIPMENT PRODUCT CATALOGUE

44 FINGER GRIP EXERCISER

- Durable High Quality Plastic Frame Made by Injection Molding Method
- Very good for paralytic patient, for weak hand after fracture etc... few springs can be removed temporary if needed for very weak paralysis hand

HAND
STRENGTH

45 WOBBLE BOARD

- This advanced wobble balance board is suitable for kids, teens, and adults alike, making it a versatile tool for enhancing fitness routines together.
- Enhancement: Designed to challenge users' balance and stability, the board features a dynamic wobbling base that engages core muscles and promotes coordination and proprioception.

BALANCE &
COORDINATION

46 HAND EXERCISER TABLE

- Wrist and Forearm exercises physiotherapy and strengthening. Specifically, hand exercises can: Strengthen the muscles around the joints for better support. Increase the circulation of synovial fluid. Improve blood flow to your hands, warming the muscles and ligaments

HAND & WRIST
REHABILITATION

47 SHOULDER PULLY

- Keeps you active and full of energy
- Have effective changes and improves health
- Is easy to use due to the simple design. Used for physio therapy at clinics. Treats you with electro therapy

SHOULDER
MOBILITY

48 FOOT STEPPER

- This double step wooden stool is very useful for It makes it easy for the old or overweight clients to climb on to the colour can be customized as per your requirements. This is wooden step used to get on the We have made it with two steps so that one can easily get on the bed.

FOOT
SUPPORT

49 TILT TABLE MANNUAL

- Tilting Tables support a patient from a horizontal plane. From the horizontal position, a manual crank is then activated to slowly initiate the process of transitioning the table from a horizontal plane toward an increasingly vertical standing position, while the patient is properly secured to the table with safety positioning straps. The tilt table relies upon the use of gravity to do its work

TILT &
MOBILITY

55

WALL BAR EXERCISER (SINGLE STATION)

- Wall bars for climbing, hanging or swinging your body. The upper bar side arm is perfect for pull-ups or hanging and swinging exercises. Enjoy simply moving your body but also specific stretching exercise. Exercise with wall bars strengthens your core and back muscles and proves effective for treating back pain. Indeed, wall bars are most versatile.

- Improves Strength & Flexibility
- Enhances Core & Back Muscles
- Ideal for Stretching, Climbing & Hanging
- Versatile & Durable Design

56

PHYSIO LASER THERAPY 500 MW WATT

- We are offering a unique assortment of Physio Electro therapy that is an effective method for wound healing nerve regeneration pain management cosmetic regeneration soft tissue injury treatment, skin treatment, resolving viral and bacterial infections. The offered laser is manufactured using high quality components and modern tools & machines.

- 500 MW High Power Output
- Effective Pain Management
- Supports Tissue & Nerve Regeneration
- Advanced & Safe Technology

57

HNC PAIN RELIEF LASER THERAPY

- HNC Laser therapy: is a revolutionary new approach to control pain and accelerate soft tissue healing, most effective therapy to treat drug free, reduce need for surgery. Accelerate the growth of granulation tissues and new blood vessel, stimulate the protein synthesis, repair damaged cells & tissues and promote rapid wound healing.

- Drug Free Pain Relief
- Accelerates Wound Healing
- Stimulates Cell Regeneration
- Non-Invasive & Safe Therapy

58

SUNDOM PAIN RELIEF LASER THERAPY

- We introduce ourselves as a noted manufacturer and supplier of a wide fleet of Sundom Laser. This equipment is widely recommended by doctors as they provide fast pain relief from all kinds of pain diseases. This equipment is manufactured using innovative machines and tools as per the set industry guidelines and standards.

- Fast Pain Relief
- Effective for Various Pain Conditions
- Innovative Technology
- Doctor Recommended

59

ULTRAVIOLET LAMP WITH FLOOR STAND

- Made for All 16g crc round pipe constructed with power coating
- Floor-wheel, five-footed assembly, easy to move.
- With 360 degrees of freedom and the upper and lower free fixed bracket
- Temperature regulation adjustable

- 360° Adjustable Design
- Easy Mobility with Floor Stand
- Temperature Regulation
- Durable & Stable Construction

S. NO.	PRODUCT DESCRIPTION	PRODUCT IMAGE	REMARKS
60	STAINLESS STEEL GONIOMETER SET - The Goniometer is an essential tool for measuring joint angles and range of motion, making it a valuable asset for medical professionals, physical therapists, and researchers. - Percussion Knee Hammer Taylor Model: The included Percussion Knee Hammer Taylor Model with Pin and Brush adds further versatility to the set. This tool is designed to elicit reflex responses during physical examinations, contributing to a thorough assessment of a patient's neuromuscular health.		
61	MEDICAL NEUROLOGICAL KNEE HAMMER SET Complete Neurological Assessment: This set offers a comprehensive range of specialized tools including a Wartenberg pinwheel, Babinski hammer, Taylor hammer, Buck hammer, and Queen's Square Hammer, providing healthcare professionals with the necessary instruments for a thorough neurological examination.
